

Formulation

FABRIC SOFTENER "EASY IRON" APPROXIMATELY 18%

1.5.0/2991052

INGREDIENTS:

| | INGREDIENTS | % W/W |
|---|--|------------|
| 1 | Water | 77,65 |
| | REWOQUAT® SQ 1 (Quaternium-80) | 0,5 - 0,75 |
| | REWOQUAT® WE 18 (Dihydrogenated Tallowethyl Hydroxyethylmonium Methosulfate) | 20,00 |
| | Calcium Chloride, 25 % | 1,25 |
| | Perfume oil (Parfum) | 0,60 |

PROCESSING

Heat the water to approximately 45°C. Add the dyestuff and antifoam solution if required. Add REWOQUAT SQ 1. Slowly disperse the REWOQUAT WE 18, preheated to approximately 50°C, adding calcium chloride solution sufficient to maintain a good processing viscosity. Stir for about 10 minutes and cool to approximately 25°C, adding the perfume oil between 30 - 35°C. Finally adjust to the required viscosity with calcium chloride, not below 30°C.

REMARKS

Stir continuously throughout the preparation process. As far as possible avoid air entrainment. A substantial increase in the amount of calcium chloride could lead to separation of the dispersion. A dispersion with a preferred viscosity of approximately 80 mPas (+/- 40 mPas). Brookfield LVT, Sp 1, 30 rpm.
